EDUCATION

Charotar University of Science and Technology (CHARUSAT)

B.Tech in Computer Engineering

Changa, India

Oct. 2021 – May 2025

- GPA: 8.76/10.00
- Data Structures & Algorithms, Operating Systems, Design & Analysis of Algorithms, Machine Learning, Artificial Intelligence, Cloud computing, Theory of Computation, Python Programming, Software Engineering, Image Processing & Computer Vision.

Oxford School of Science

Secondary Education

Amreli, India

May 2019 – June 2021

- Percentage: 80.9%
- Grade: B1

EXPERIENCE

Edifice Valuation (Freelance Project) [🔗]

Full-Stack Developer

Ahmedabad, India

May 2024 - Apr 2025

- Created and deployed a full-stack web app using Django, DRF, and PostgreSQL; hosted on Render for beta testing.
- Collaborated with the design engineer in regular Scrum meetings to align technical development with UI/UX goals.

CHARUSAT [🔗]

Intern

Changa, India

May 2024 - June 2024

- Designed and developed a Flutter App, seamlessly integrating Supabase cloud services for backend support.
- Gained hands-on experience in deploying cloud-based solutions for real-world applications.

Google Developers Student Club - CHARUSAT [🔗]

Tech Team

Changa, India

June 2023 - June 2024

- Actively collaborated with team members to organize and execute tech events, hackathons, and workshops.
- Assisted in designing and implementing technical solutions, leveraging expertise in web and mobile development.

PROJECTS

ReachOut | PostgreSQL, ReactJS, NextJS, Django, Docker

- A personal project aimed at unifying social media handles into a single accessible platform.
- Engineered a full-stack solution, integrating web and mobile development with advanced cloud computing capabilities.
- Implemented real-time data processing, enabling dynamic and efficient user interactions across platforms.
- Mastered the production lifecycle, from development to deployment, ensuring a scalable, reliable, and high-performing application.

Penguin Model | C#, Unity, ML-Agents

- Developed an AI Penguin within a Unity environment using ML-Agents.
- Implemented machine learning algorithms to enable the Penguin to hunt fish, showcasing survival instincts.
- Trained the AI to provide for both itself and its young, demonstrating natural behavioral patterns.
- Utilized C# for logic and Unity for environment design, simulating real-world survival scenarios.

CONFAB | HTML, CSS, JavaScript, Django

- Built an exclusive and anonymous online discussion forum for organizations valuing privacy and transparency.
- Allowed users to ask and answer questions freely without requiring a username, ensuring anonymity.
- Developed using Django for the backend, with a responsive frontend built using HTML, CSS, and JavaScript.

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, HTML/CSS, Shell Scripting, Go, SQL, Dart

Frameworks: React, Node.js, Django, Tensorflow, Flutter, Docker

Developer Tools: Git, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib

ACHIEVEMENTS

Recommender Systems and Deep Learning in Python

Certificate
